They injected. Now the bodies speak. 8,4 million patients. A national database. A country without Big Pharma. Just the numbers. Just the dead.

And the results? A massacre under media anesthesia.

A study published in *Biomarker Research* reveals what courageous doctors were already denouncing in hushed tones:

Langues »

An explosion of cancers in the year following COVID vaccination. Not impressions. Not isolated cases. Statistics. Correlations. Targeted organs.

The figures that kill the doubt: 1 year after the injection, +69% risk of prostate cancer, +53% for lung cancer, +34% for stomach cancer, +35% for thyroid cancer, +28% for colon and rectum cancer, +20% for breast cancer.

(Source: *Biomarker Research*(2025) And they still dare to say that "COVID vaccines are safe and effective"?

They denied everything – even the obvious

While accounts were being deleted, while caregivers were being suspended, while families were burying their loved ones who were too young, too soon…

The data was piling up.

And the downward spiral became irreversible. It's no longer a matter of opinion, it's a measurable health crisis.

Not one case in millions: a hidden collective narrative

The myth: "Vaccines only save lives." The reality: a fraction of the population develops fulminant tumors within 12 months. These cancers are not normal:

aggressive, young, multi-organ, refractory

often detected in people with no prior history

temporally linked to the injection… but never declared as such

The mechanisms? We know them.

Lipid nanoparticles don't remain in the arm. Pfizer studies had already shown this in 2020 (biodistribution in rats, ovaries, liver, lymph nodes). But they kept it from you.

Chronic inflammation, immune dysregulation, endothelial cell activation:

The perfect breeding ground for precancerous cells to explode. And all this… for a virus with a 0,05% fatality rate in young people.

The medical and media code of silence no longer holds.

Why is this South Korean study frightening? Because it's not European. Not American. Not under any influence. It's a country that has the resources to rigorously monitor its citizens, free from industrial pressure. And now that the figures are out, who's going to respond?

WHO?

Pfizer?

Ursula von der Leyen?

The question that needs to be asked:

How many more silent deaths will we tolerate instead of admitting the mistake? Those who know remain silent. Those who speak out are punished. But the numbers cannot be censored.

Call to action

Un *like* That's not enough. Share this scientific bombshell before it's buried. Hold your elected officials accountable. Break the wall of medical silence.

Together, we reveal what they tried to erase.
